

AUTOCAD COURSE CONTENT

Duration- 6 Weeks

WEEK - 01

Introduction & 2D Drafting Basics

- Overview of CAD and AutoCAD Interface
- Coordinate systems: Absolute, Relative, Polar
- Basic drawing tools: Line, Circle, Rectangle, Arc, Polygon
- Modify tools: Erase, Move, Copy, Rotate, Mirror, Scale, Trim, Extend
- Object Snap (OSNAP), Ortho Mode, Grid & Snap
- Practice: Simple geometry drawings

WEEK - 02

Drawing Management & Annotations

- Layers and Layer Properties Manager
- Object Properties (Color, Linetype, Lineweight)
- Text: Single-line and Multiline text (MTEXT)
- Dimensions and dimension styles
- Hatching and Gradient fills
- Practice: Room layout with proper annotations

WEEK - 03

Advanced 2D Drafting Tools

- Layers and Layer Properties Manager
- Object Properties (Color, Linetype, Lineweight)
- Text: Single-line and Multiline text (MTEXT)
- Dimensions and dimension styles
- Hatching and Gradient fills
- Practice: Room layout with proper annotations

WEEK - 04

Working with Layouts and Plotting

- Model space vs. Paper space
- Creating viewports and managing scale
- Title blocks and borders
- Plotting & printing drawings (Page setup, PDF creation)
- Practice: Complete architectural or mechanical drawing with layout

WEEK - 05

Introduction to 3D Modeling

- 3D basics: Isometric views, UCS, 3D navigation
- 3D drawing tools: Extrude, Revolve, Sweep, Loft
- Editing 3D models: Union, Subtract, Intersect, Fillet
- Creating 3D surfaces and meshes
- Practice: Simple 3D mechanical component

WEEK - 06

Project Work & Certification Prep

- Mini-project: Real-world 2D/3D drawing (mechanical/architectural)
- Review of all topics
- Customization: Toolbars, Workspaces, Templates
- Tips for AutoCAD Certification (AutoCAD Certified User/Professional)
- Final test and feedback
